EXPERIENCE

UX Designer Lead // Persistent System Ltd.

Feb 2021 - Present • Pune, India

Currently working as a Product Designer for a SaaS company, I am the sole designer from India working with a globally distributed team from the US. I spearhead UX enhancements, design wireframes, guide MVP releases, and deliver final products while managing multiple design tracks simultaneously to meet project timelines and goals.

In life science projects, I conducted comprehensive usability testing, user and stakeholder interviews, developed detailed wireframes, and created interactive prototypes to ensure a seamless user experience.

For banking and finance projects, I led stakeholder interviews, collaborated with cross-functional teams, established and maintained a robust design system, and held accountability for all design-related decisions.

Senior UX Designer // Infosys

Dec 2018 - Jan 2021 • Pune, India

I played a pivotal role in a major banking project, where I redefined user experiences for Global Treasury & Trade Transactions by understanding the requirements through constant collaboration with the stakeholders to understand the ideas and vision, creating a robust reporting system.

Played a key role in transforming the experience of a German logistics company that provides courier, express mail service, delivering over 1.7 billion parcels per year. I was instrumental in creating last-mile platform, improving delivery efficiency, and enhancing user satisfaction through meticulously designed user interfaces and experiences.

UX/UI Designer // Ittisa

Oct 2017 - Nov 2018 • Bangalore, India

Facilitated client vision through comprehensive research, sketching, prototyping, and user testing. Collected and analyzed customer data to create user journeys, task flows, and wireframes. Collaborated with stakeholders, project managers, and developers to design end-to-end experiences for major applications. Adhered to Agile processes, fostering a collaborative and iterative design environment.
